

Factor graph

bipartite: round variables, square factors; an edge wherever a variable is a factor's argument

○ variable x_i ■ factor f — incidence (undirected)

$$p(x_1, x_2, x_3, x_4) \propto f_a(x_1, x_2) \cdot f_b(x_2, x_3) \cdot f_c(x_2, x_4)$$
